                                                                                                                                                                                                                                                                                                                   Sequence 12, Application US/09493353

Sequence 12, Application US/09493353

Patent No. 6638714

GENERAL INPORMATION:
APPLICANT: Johnson & Johnson
APPLICANT: Johnson & JOHNSON
TITLE OF INVENTION: OLIGONUCLEOTIDE PRIMERS FOR EFFICIENT
TITLE OF INVENTION: DISCONUCLEOTIDE PRIMERS FOR EFFICIENT
TITLE OF INVENTION: DISCONUCLEOTION OF HEPATITIS C VIRUS (HCV) AND METHODS OF USE
TITLE OF INVENTION: THEREOF
TITLE OF INVENTION: DISCONUCLEOTION OF HEPATITIS C VIRUS (HCV) AND METHODS OF USE
CURRENT FILING DATE: 2000-01-28

PRIOR PRILING DATE: 2000-01-28

PRIOR PRILING DATE: 1999-02-03

NUMBER OF SEQ ID NOS: 15
                                                                                                              ö
                                                                                                              ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 50, Application US/08438639

Patent No. 6297370

GENERAL INFORMATION:

GENERAL INFORMATION:

TITLE OF INVENTION: HCV GENOMIC SEQUENCES FOR

TITLE OF INVENTION: DIAGNOSTICS AND THERAPEUTICS

NUMBER OF SEQUENCES: 147

CORRESPONDENCE ADDRESS:

ADDRESSEE: Wolf, Greenfield & Sacks, P.C.

STREET: 600 Atlantic Avenue

STATE: Massachusetts

CONNTRY: USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      COMPUTER READABLE FORM:

Patent No. 6214583

GENERAL INFORMATION:
APPLICANT: Tai.An Cha
APPLICANT: Eileen Beall
APPLICANT: Janice Kolberg
APPLICANT: Janice Kolberg
APPLICANT: Michael S. Urdea
TITLE OF INVENTION: HCV GENOMIC SEQUENCES FOR
TITLE OF INVENTION: DIAGNOSTICS AND THERAPEUTICS
NUMBER OF SEQUENCES: 148
                                                                                                                                                            FILING DATE: 8 May 1991
ATTORNEY/AGENT INFORMATION:
MAME: Janiuk, Anthony J.
REGISTRATION NUMBER: 29,809

Patent No. 624545

GENERAL INFORMATION:
APPLICANT: Dyamichev, Victor I.
APPLICANT: Prudent, James R.
APPLICANT: Prudent, James E.
TITLE OF INVENTION: Polymorphism Analysis By Nucleic Acid
TITLE OF INVENTION: Structure Probing
NUMBER OF SEQUENCES: 38
CORRESPONDENCE ADDRESS:
ADDRESSE: MEDLEN & CARROLL, LLP
STREET: 220 Montgomery Street, Suite 2200

Sequence 33, Application US/08934097A

Patent No. 6210880

GENERAL INFORMATION:
APPLICANT: Brow, Mary Ann D.
APPLICANT: Fors, Lance
APPLICANT: Fors, Lance
TITLE OF INVENTION: Structure Probing With Structure-Bridging
TITLE OF INVENTION: Oligonucleotides.
NUMBER OF SEQUENCES: 51
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ..

Sequence 31, Application US/08934097A

Patent No. 6210880

GENERAL INFORMATION

GENERAL INFORMATION

APPLICANT: Lyamichev, Victor I.

APPLICANT: Fors, Lance

APPLICANT: Fors, Lance

APPLICANT: Nerl, Bruce

TITLE OF INVENTION: Structure Probing With Structure-Bridging

TITLE OF INVENTION: Oligonucleotides.

NUMBER OF SEQUENCES: 51

CORRESPONDENCE ADDRESS:

ADDRESSEE: MEDIEN & CARROLL, LLP

Sequence 29, Application US/09825574
Patent No. 6709819
GENERAL INFORMATION:
APPLICANT: Lyamichev, Victor I.
Brow, Mary Ann D.
Fors, Lance
Neri, Bruce P.
TITLE OF INVENTION: Polymorphism Analysis By Nucleic Acid
Structure Probing With Structure-Bridging
Oligonucleotides.
TITLE OF INVENTION: Polymorphism Analysis By Nucleic Acid
Structure Probing With Structure-Bridging
Oligonucleotides.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ;
